1. Executive Summary

The Metalogue public project website went online during M4 of the project. It serves as the main dissemination channel of the project.

The project website is at: <http://www.metalogue.eu>

The initial structure of the website is straightforward and reflexes the general aspects of the Metalogue project (Goal/Activities/Results/). It also provides a direct link to the project's presence in social media (Twitter, LinkedIn).

The further development of the website will be organized in the following directions:

- All public deliverables/publications will become accessible;
- All project dissemination activities will be also presented;
- The public demos of the system and its components will be accessible through the website;
- Any other items deemed useful for the project dissemination will be integrated with the website.
